

The Medical Centre Sun Screen Competition

As the building of the Medical Centre proceeds, we need to look at some of the finer detail to ensure we keep ahead of the builder.

The architect, who designed the building, included a large screen to prevent the afternoon sun heating the center through the glass frontal area as shown in the sketch..

The builder will be laying a concrete foundation about a meter away from the glass panels so that we can attach whatever screen we would like.

Council is asking residents to offer suggestions for an unusual design that would show off our center and yet still offer shade to the waiting room. Ideally materials used should be maintenance free.

All concepts will be displayed and if a design is accepted the originator will be recognized on the screen.

Emergency number for council over Xmas is 63862126.

Merry Xmas to all and I hope that 2008 brings us all what we need and some of what we'd like.

Philip Hockney. OAM Mayor.
